

Inhalt/Contents

- Abe M: Holomorphic affine bundles on the complement of an analytic set 539
- Abo H, Decker W, Sasakura N: An elliptic conic bundle in \mathbb{P}^4 arising from a stable rank-3 vector bundle 725
- Andradas C \rightarrow Díaz-Cano A
- Berndt J: Homogeneous hypersurfaces in hyperbolic spaces 589
- Bobenko AI: Helicoids with handles and Baker-Akhiezer spinors 9
- Campana F, Kreußler B: A conic bundle description of Moishezon twistor spaces without effective divisors of degree one 137
- Chamizo F, Pomykala J: Distribution of zeros of twisted automorphic L-functions with large level 575
- Chiarli N, Greco S, Nagel U: On the genus and Hartshorne-Rao module of projective curves 695
- Clerc J-L: Compressions and contractions of Hermitian symmetric spaces 1
- Dancer EN: Superlinear problems on domains with holes of asymptotic shape and exterior problems 475
- Decker W \rightarrow Abo H
- Díaz-Cano A, Andradas C: Stability index of closed semianalytic set germs 743
- Dineen S, Mellon P: Holomorphic functions on symmetric Banach manifolds of compact type are constant 753
- Dipper R, James G, Mathas A: Cyclotomic q -Schur algebras 385
- Ecale J, Vallet B: Correction and linearization of resonant vector fields and diffeomorphisms 249
- Eschenburg J-H: Parallelity and extrinsic homogeneity 339
- Ghousseb N \rightarrow Gui C
- Glasauer S: Translative and kinematic integral formulae concerning the convex hull operation 493
- Globevnik J: On Fatou-Bieberbach domains 91
- Greco S \rightarrow Chiarli N
- Green EL, Solberg Ø: Basic Hopf algebras and quantum groups 45
- Green RM: Cellular algebras arising from Hecke algebras of type H_n 365
- Greither C: The structure of some minus class groups, and Chinburg's third conjecture for abelian fields 107
- Gui C, Ghousseb N: Multi-peak solutions for a semilinear Neumann problem involving the critical Sobolev exponent 443
- Hebisch W: Spectral multipliers on exponential growth solvable Lie groups 435
- Herzog G, Lemmert R: On universal subsets of Banach spaces 615
- Hoa LT, Trung NV: On the Castelnuovo-Mumford regularity and the arithmetic degree of monomial ideals 519
- Huneke C, Ribbe J: Symbolic squares in regular local rings 31
- James G \rightarrow Dipper R
- Kan S-J: On the rigidity of non-positively curved Grauert tubes 349
- Krause H: Representation type and stable equivalence of Morita type for finite dimensional algebras 601
- Kreußler B \rightarrow Campana F
- Lemmert R \rightarrow Herzog G
- Mathas A \rightarrow Dipper R
- Matthes R: Shimura lift of real analytic Poincaré series and Hilbert modular Eisenstein series 547
- Mellon P \rightarrow Dineen S
- Micchelli CA, Sauer T: On vector sub-division 621
- Nagel U \rightarrow Chiarli N
- Peeva I, Sturmfels B: Syzygies of codimension 2 lattice ideals 163
- Picard R: On a selfadjoint realization of curl in exterior domains 319
- Pomykala J \rightarrow Chamizo F
- Ribbe J \rightarrow Huneke C
- Rumberger M: Finitely differentiable invariants 675
- Sasakura N \rightarrow Abo H
- Sauer T \rightarrow Micchelli CA

Schoen R, Wolfson J: Theorems of Barth-Lefschetz type and Morse theory on the space of paths 77

Schröter C, Schuba S: The deformations of the simple space curve singularities 607

Schuba S → Schröter C

Solberg Ø → Green EL

Sturmfels B → Peeva I

Terakawa H: Higher order embeddings of algebraic surfaces of Kodaira dimension zero 417

Trung NV → Hoa LT

Vallet B → Ecalle J

Wolfson J → Schoen R

Wu J: On the homology of configuration spaces $C((M, M_0) \times \mathbb{R}^n; X)$ 235

Zhang W-B: Mean-value theorems of multiplicative functions on additive arithmetic semigroups 195
